Call and data flows

Inbound entry: A contact hits one point of contact, one script, and one starting skill.
Words on the page: Contact is the person. Interaction is the conversation. Digital is a product family.
Tenant down to skill: Admin calls the tenant the billing and global container. Skills are created in a campaig
Two agent-leg options: Integrated Softphone is the product. WebRTC is the Chrome technology it uses.
Two legs: The carrier hop and the agent hop are not one protocol.
Overall priority: Overall priority is (time in minutes  acceleration) + initial priority.
Bullseye window: Proficiency 1 is best and 20 is worst. REQAGENT opens a window. UpdateContact can widen it.
Personal Connection exception: Acceleration is forced to 0 so outbound dialing does not age like an inbound qu
A Classics-style chain: BEGIN, a menu, a skill request, music, then a wider window.
New inbound digital: Since Summer 2023, new inbound digital work uses skills and scripts.
Forecast before the schedule: History becomes volume and AHT, then a staffing plan.
Recording beside QM: Stereo is the recording default this campus teaches from the recording page. Hold audio i
What the recorder keeps: Hold audio, including hold music, is not recorded. A consultation during hold is reco
Autopilot voice and text: Voice setup needs NiCE. Text turns go through Digital Experience and the script.
AutoSummary types: The help page names Structured, Generative, and Hybrid. Email is not supported.
Two grants, two jobs: Back-end integrations on the auth page use the password grant. A person in a browser fol
Find the API host: tenantId comes from the ID token. The example host is not every tenant.
Salesforce billing gate: Billing follows how many employees have the Agent Integrations attribute.
Emergency dialing: An outbound voice skill, a verified address, and a callback. 933 is the no-charge test name
IP voice ports the page names: SIP register to 5060 and 5061. Hardphones also need NTP 123. RTP and SRTP use U
Screen monitoring ports: UDP 443 or 3478 for WebRTC NAT traversal. Port 31322 is internal to the agent PC.
Named third-party telephony ports: These bullets name the system. UCCE CTI ports have no default.
Supervisor WebRTC monitor: Engagement Hub voice monitoring uses WSS 443 and 10081, then inbound UDP media.
A release reaching you: Coming Soon is 30 days before beta. Your cluster is not beta day.
Three cluster kinds: Commercial, FedRAMP, and sovereign are defined on the connectivity requirements page.
Badges this campus will name: Credly badge names only. No exam codes or prices are invented.
Three different moves: A WFM connector, Multi-ACD recording, and Migrated Calls are not one cutover.
CRM ticketing pair: The FAQ names Salesforce and Zendesk. Retention on that page is 90 days.
Ecosystem orbit: ACD sits in the middle. Each neighbor is a different product surface.
An integration’s life: Register, pick a grant, discover the tenant, call, and treat the secret as shown once.
Menu to skill: MENU stores the choice. The branch requests a more specific skill.
Analytics leaves the tenant: Four prebuilt Interaction Analytics reports, widgets, and a JSON export.
Security gates the pages name: TLS 1.2, a one-time secret, a role, and an optional external IdP.
Toll-free and RespOrg: If CXone is the RespOrg, more toll-free numbers are ordered through CXone.
Engagement Hub intake: Third-party PABX, ACD, CRM, digital, and dialer data can feed Supervisor, Copilot, QM,
Admin multi-region BCP: The ports page names HTTPS 443 for the Multi-Region BCP interface, with optional HTTP
