TLS

Connectivity in NiCE CXone requires at least TLS 1.2.

Inbound, from CXone to your servers, must support at least one of: TLS_DHE_RSA_WITH_AES_128_GCM_SHA256 (0x009

Outbound, from your servers to CXone, must support at least one of: TLS_ECDHE_RSA_WITH_AES_128_GCM_SHA256 (0x

Keys and people

An access key belongs to an employee and inherits that employee s permissions. The secret is shown once. Disab

User-facing apps in this lab follow the authorization-code flow. The authentication pages also show a password

External IdP is a documented setup, not the default this page assumes you have.

FedRAMP is an environment, not a slogan

The connectivity requirements page describes FedRAMP as isolated from commercial operations, with continuous m

This campus does not claim HIPAA, PCI, SOC 2, or a particular encryption-at-rest setting. Those sentences are
